

Quick Start Guide

Version 1.0

Overview:

RemoBackup is an application and service that provides “data insurance” for the contacts stored on your mobile phone. RemoBackup solves the problem of losing data from a lost or damaged phone. RemoBackup takes a backup of all the contact data on a phone and restores those contacts to a new phone. RemoBackup ensures that all your contact information is safe

New User Registration process:

New users click on **New User** option to register for an account. This takes you to the **Registration Screen**. Select your country and then Enter your mobile phone number and PIN number.

Note: If you are already a registered user, then login as an **Existing User** and provide your **Phone & PIN number**

Main Menu:

Select **Backup** option to back up all the contacts from your phone to the server including the last known changes on the phone.

Restore Contacts:

Selecting **Restore Contacts** from the Main Menu will download all the contact information from the server to your mobile phone. A Status indicator provides information on the progress of the Restore operation.

Changes Uploaded:

A notification to the user at the end of the process indicates the no of changes and number of contacts restored.

Last Backup:

Last Backup indicates the time of the last backup from the mobile phone to the server.

Settings:

Select **Settings** to modify your Phone Number & the PIN Number information

You can use the Setting option to Edit Registration Information.

Note: By editing the Phone number information, the new number will be used for all future log ins.

Accessing iPhonebackup from the Web Interface:

You can view all your backed up contacts on the Web Interface. To do that,

Open your browser e.g. Internet Explorer®:
Enter the URL as <https://iphonebackup.remoba.com/ibu>

Enter the Phone number & the PIN number to Login to the Contacts page.

To download selected contacts to Phone , use the Add the Contacts and save.

Select ‘**Restore Selected**’ option.

A download icon appears against the selected Contact. Click on this icon to download the selected Contact.

Click on **Import tab** to import your contacts.

You can Export your contacts to “.csv” file. Browse the .csv file.

Press **Import Now** to import the contacts from the .csv file. Your contacts list is imported now.
